01 ORDER FACTS

MINIMUM ORDER	100 pcs per colour.
COLOUR AND SIZE	each colour is its own minimum; sizes mix inside one.
PROTOTYPE SAMPLE	7-10 working days from the tech pack locking.
FIT REVISIONS	3-5 fit revisions inside that window.
SAMPLE CHARGE	US\$80-150 per style, credited on bulk 500+.
BULK PRODUCTION	7-15 working days from the sealed sample.
FINAL INSPECTION	AQL 2.5.
FREIGHT	DDP, DAP or DPU, whichever the destination allows.
TRANSIT	air 5-7 days, sea 30-45 days.
STANDARDS HELD	OEKO-TEX Standard 100, BSCI and GRS.
CERTIFICATES	issued with the quote, not held until dispatch.

02 THE MILL

20,000 sqm floor | 400+ people | ~1,000,000 pcs a year | operating since 2015.

Sampling, bulk and final inspection all run on one site, so what is approved at the sample is what the line works to.

03 THE NINE PIECES

Every piece is cut to your own block and panel layout. The lines below say what each one is for; the measurements come off your chart.

- 01 Skorts and skirts - A-line or straight over an attached inner short.
- 02 Pants - straight, tapered or slim on your rise, gusseted at the crotch.
- 03 Shorts - mid-thigh, flat front or pleated, bound hems and bar-tacks.
- 04 Polos - set-in or raglan sleeve, collar stand and placket depth set by you.
- 05 Base layers and mock necks - slim in the body, flatlock at the shoulder.
- 06 Quarter-zip pullovers - fitted in the body, roomy at the shoulder.
- 07 Vests - sleeveless over a polo; quilting and pocket position to your spec.
- 08 Jackets - shell, lining and collar set by you; shoulder seams taped.
- 09 Golf bags - panels cut from your cloth, pockets and dividers to spec.

04 FIT DECISIONS

- 1 Collar - flat knit, ribbed, button-down, Johnny or zip mock neck.
- 2 Sleeve - sleeveless, cap, short, three-quarter or long with a thumbhole.
- 3 Hem - straight, drop tail, side-vented or a curved athletic hem.
- 4 Block - classic, slim, relaxed or athletic, on your own block.
- 5 Sizing - graded from the chart you supply; no stock chart is used.

05 DECORATION

- A High-density embroidery - colourfast thread and a clean edge on a crest. For crests, caps and club kit.
- B Screen printing and heat transfer - solid ink on a flat panel, and a finer mark pressed on after sewing.
- C Full sublimation - pattern dyed into the fibre before the panel is cut, for all-over graphics.
- D Brand assets - Pantone TPX or TCX codes matched on the cloth, with your own placement rules.

06 FABRIC DIRECTIONS

- A Performance pique knit - a raised face that holds shape and moves air; 160-200 GSM.
- B Stretch woven - stretch across the cloth as well as down it, so it recovers.
- C Brushed mid-layer knit - fleeced inside and smooth outside, for a quarter-zip.
- D Bonded softshell - a woven face on a light backer, turning wind at the front.
- E Recycled polyester (rPET) - reclaimed plastic, dyed on a lower-impact route.
- F Sun-blocking technical knit - UV blocked at UPF 30-50+, and snag-resistant.

Weight, blend and hand are quoted off your own tech pack. Nothing above is a stock fabric.

Pieces are finished to come through repeated swings without twisting, shrinking or sagging, and deep-dyed against fading.

07 HOW TO START

Have the piece list, the sizes, the quantities per colour and the course they are worn on to hand. A polo you already play in is as useful as a drawing.
